PATENT AND TRADEMARK OFFICE

Declaration and Power of Attorney

As a below named inventors, we hereby declare that:

Our residence, post office address and citizenship are as stated below next to our respective names.

We believe that we are the original, first and joint inventors of the subject matter that is described and claimed in Patent No. 5,991,380, issued on November 23, 1999, entitled **Universal Telecommunications Services Account**, the application for which was filed on October 21, 1997 as application Serial No. 08/955,840 (Henceforth, "our patent").

We hereby offer to surrender our patent, and solicit in its place a reissue patent for the invention, which is described and claimed in the attached reissue application and preliminary amendment.

We verily believe our patent to be partly inoperative by reason of us claiming less than we had the right to claim. Specifically, we realize that various limitations in the independent claims unduly narrow the scope of our invention. For example, each of the independent claims contains a limitation of relating to rates, but this limitation is not reflective of the broad scope of our invention.

The error arose during the preparation of the application for the original patent, and without deceptive intent on our part. More specifically, the error arose because, in preparing the patent application, we, and the attorneys who helped us, focused on the illustrative examples that we disclosed, and somehow failed to step back, just prior to filing the application, to sufficiently and critically evaluate the claims relative to what we believed our invention to be, rather than relative to the specific illustrative embodiment that was disclosed.

The fact that an error possibly has occurred in the formulation of our patent first came to the light in the course of a patent review by the assignee of this invention, and more specifically, by Mr. Robert Levy, Esq. of AT&T, who engaged Mr. Brendzel Esq. to look into the matter with an eye toward correcting the problem. Upon careful consideration of the issue, Mr. Brendzel concluded that our patent is inoperative by reason of the patentees claiming less than they had the right to claim in the original patent. Having so concluded brought the matter to the attention of Mr. Markowitz, one of the inventors of the subject patent, who agreed that a reissue application ought to be filed.

Our patent is not presently involved in litigation.

We hereby state that we have reviewed and understand the contents of the above-identified specification and preliminary amendment.

We acknowledge the duty to disclose information that is material to the examination of the application, in accordance with Title 37 of the Code of Federal Regulations, section 1.56(a).

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

We hereby appoint the following attorney(s) with full power of substitution and revocation, to prosecute said application, to make alterations and amendments therein, to receive the patent, and to transact all business in the Patent and Trademark Office connected therewith:

Samuel H. Dworetsky	(Reg. No. 27873)	Thomas A. Restaino	(Reg. No. 33444)
Michele L. Conover	(Reg. No. 34962)	Cedric G. DeLaCruz	(Reg. No. 36498)
